

Chemical X

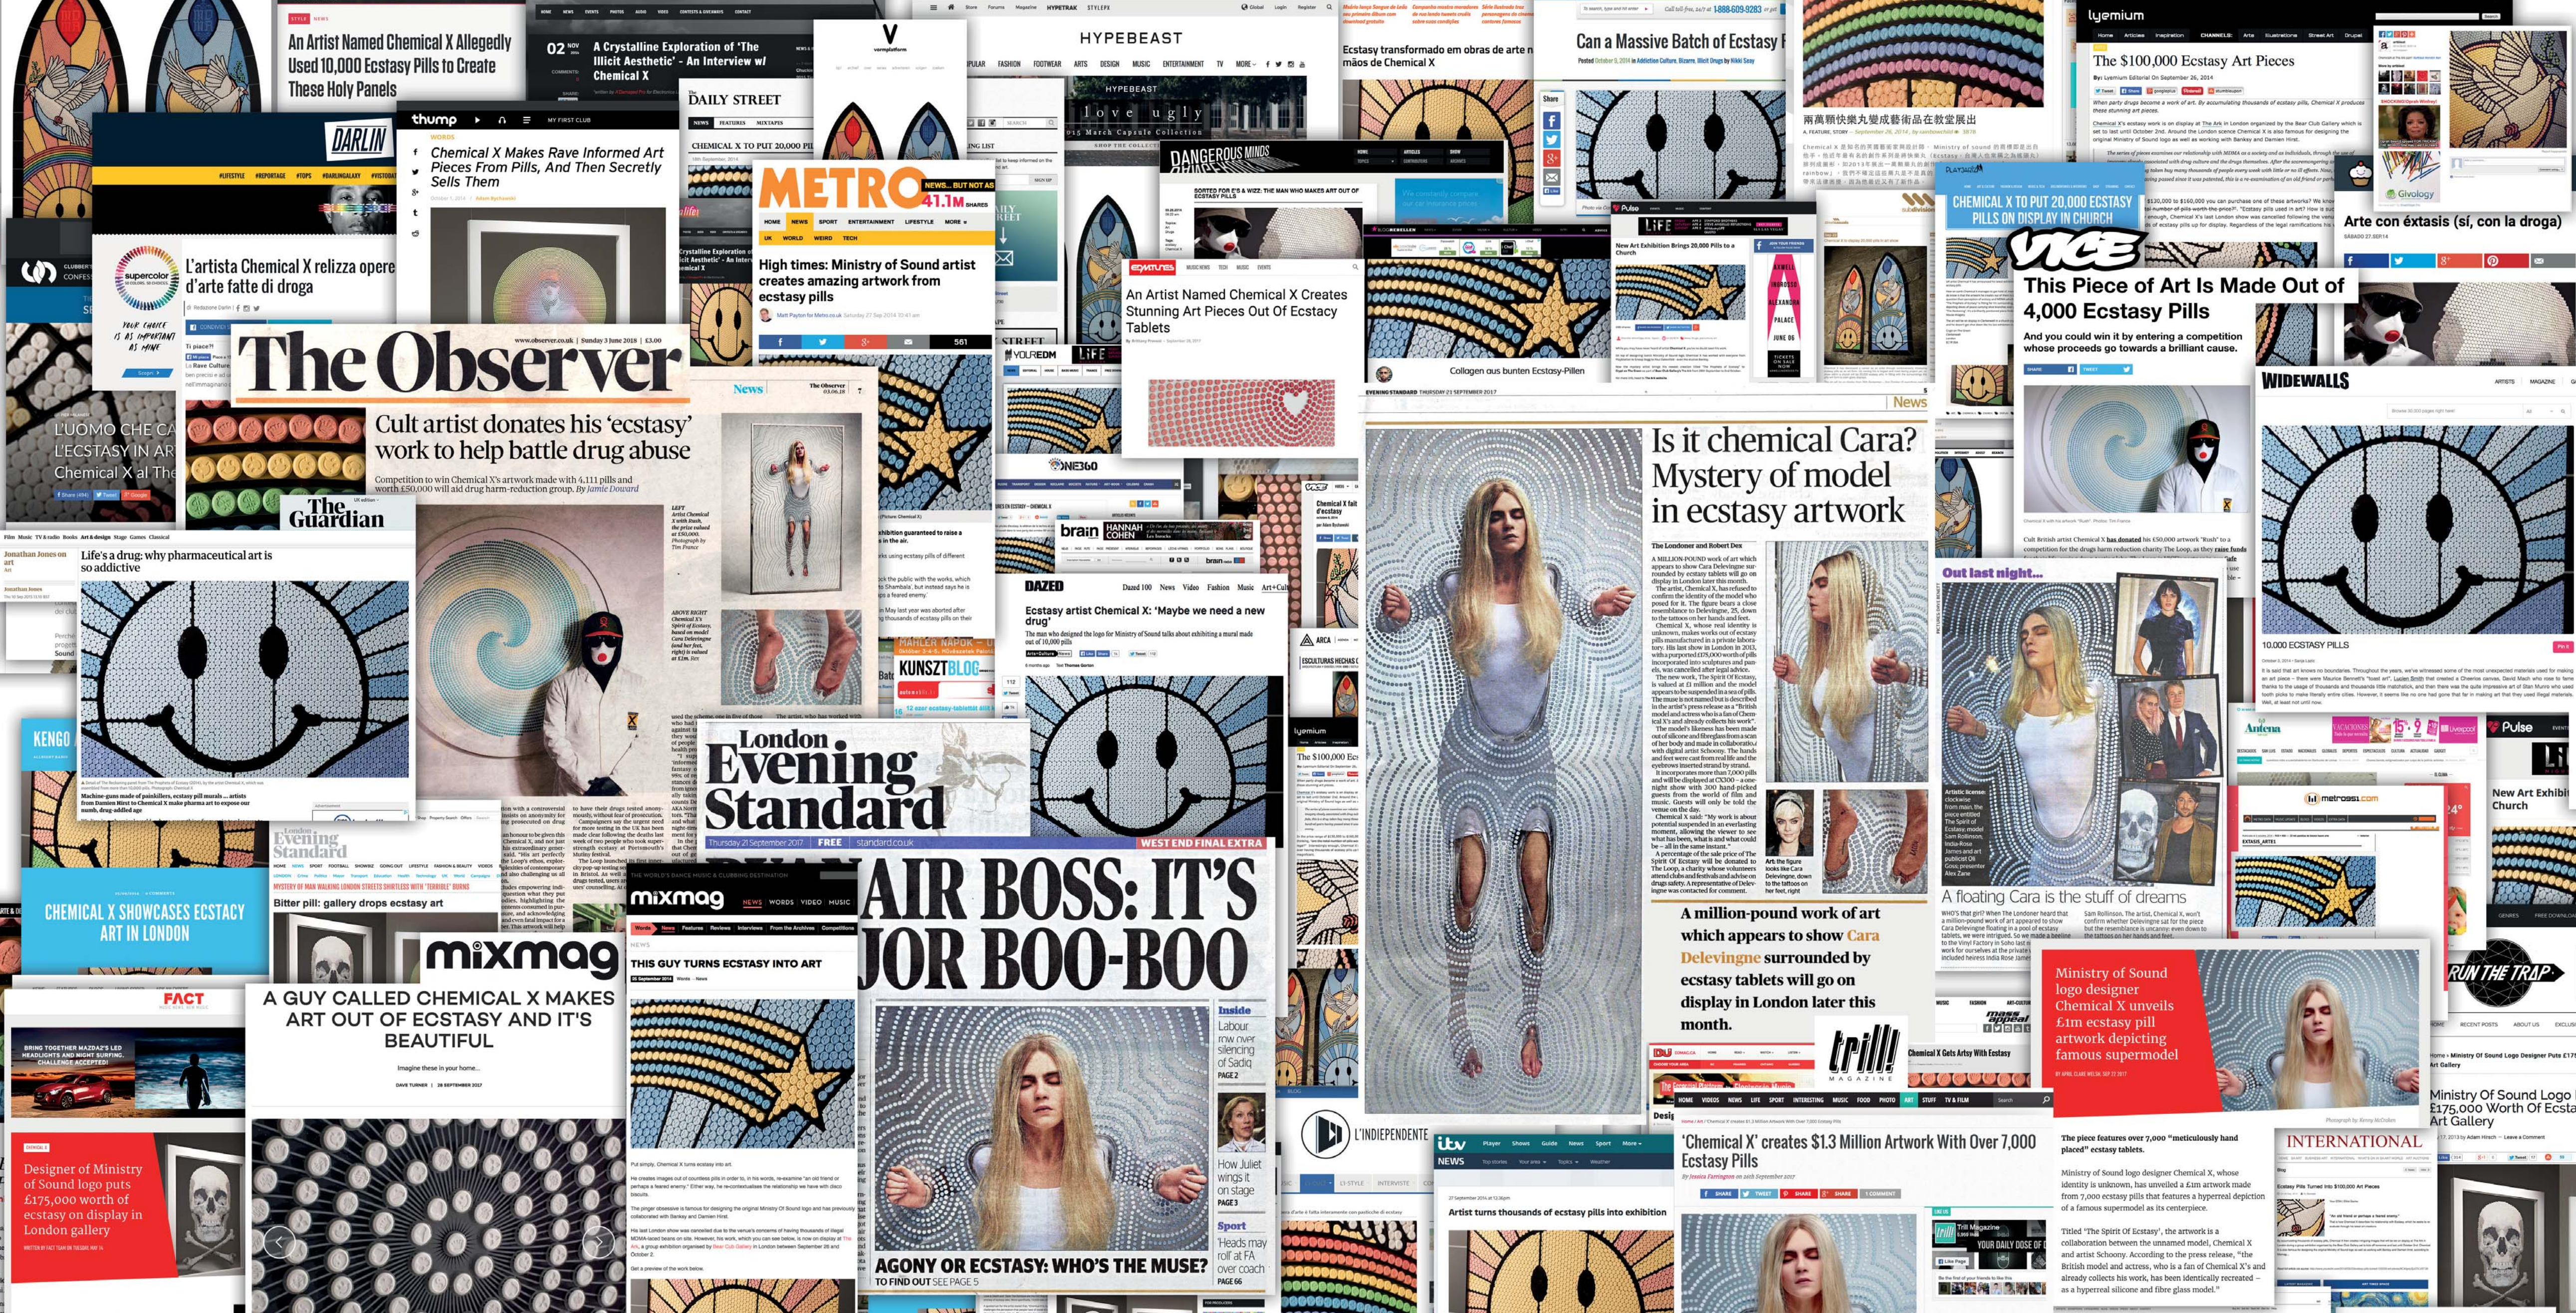

Chemical X is the pseudonym of someone that prefers the art to be the focus, not the artist.

His work is sold privately and collected internationally by individuals who prefer to remain anonymous.

“This set of work is about potential, suspended in an everlasting moment, allowing the viewer to see what has been, what is and what could be - all in the same instant. The work is only completed when the viewer stands in front of it and brings their own relationship to bear on the subject matter.”

The Spirit of Ecstasy
